## Settings Automation Result - (Dhruvil)

In the doctors dashboard the signatures is not being updated this happens when clicking the submit button and then reloading the page (error)

Password is being changed successfully

Personal Information is being changed successfully

When you try to update the user info it is necessary to fill all the details. If one information is not filled it will not submit / update the information (correct )

Rest every button is working

## Contact Us Automation Result - (Dhruvil)

Test 1 (real values) : All the values when properly added (correct)

Test 2 (Fake values) : Fake values ie. wrong email and wrong phone number (correct)

Test 3 (incomplete values) : It is necessary to fill all the fields (correct)

Test 4 (Less than 10 digit number) : It works when only 1 or 2 phone digit are only entered  
(Shouldn't work but works)(Error)

Test 5 (Email) : It doesn't work when '@gmail.com' is not entered in the Email Address (correct)

\*All the buttons are working \*
